

### Benefits

QEI has a rich history of upgrading and replacing SCADA systems. Through QEI, you can upgrade to our windows based platform, **QSCADA**, which comes with the hardware, software, training, and ongoing support you need for the smart grid environment of today and into the future.

**QSCADA** is QEI's latest suite of SCADA software. QSCADA provides the functionality you need with easy configuration tools to simplify your implementation. From device-level visualization, to full system overviews, QSCADA provides you immediate access to your device and system information.

**QSCADA** can also be enhanced with our **QOMS** (Outage Management System), **QGIS** (Geographic Information System), and/or be developed into a full **ADMS** (Advanced Distribution Management System).

Translation and Migration Of Existing SCADA System Database and Displays  
Supply of All Required Hardware (Operator Consoles, UPS, Dispatch Office Display Systems, etc.)

Integration of New and Existing Intelligent Electronic Devices

Upgrade or replace existing RTUs, possibly re-using existing enclosures

Support and training from a long-term reputable SCADA provider

Provide SCADA information to your mobile devices

One, Three, or Five-year Complete Warranty (Renewable) with Unlimited Web and Telephone Support

Microsoft  
**Windows**
