

QCONNECT[®]

A unified solution designed to enhance control, efficiency, and reliability while delivering a world-class integrated platform for utility automation.

THE FUTURE OF UTILITY MANAGEMENT

SCADA SOLUTIONS

Make your system smarter and more efficient with our Windows-based solution for collecting and analyzing data.

QEI's affordable SCADA solution for medium to small utilities.

Most advanced quad redundancy for highest availability.

QEI's substation HMI platform for transformer and generator monitoring, generalized control and monitoring of substation devices.

QEI's browser HMI solution Works in conjunction with QSCADA to see WorldView displays, maps, graphs, and alarms. Tablet and mobile phone compatible.

ADMS SOLUTIONS

Distribution Management System
Monitor and control your energy grids for secure, stable and efficient operations.

Energy Management System
Manage, monitor, and optimize the generation, transmission, and distribution of your utility.

Outage Management System
For the management of your distribution network and to identify and record all operations.

Enterprise Asset Management
Manage, maintain, and optimize your utility's physical assets.

Geographical Information System
For the analysis, optimization, and management of your electric distribution networks.

Decision Support System
Process large amounts of information, identify patterns, and present options to solve problems or optimize operations.

Automation Control

Providing real-time monitoring, control, and automation in a modular design for scalability.

Capacitor Controllers

Regulate voltage levels, reduce losses, and improve power quality of your distribution networks.

Distributed I/O

Monitor and control your utility from remote locations.

Power Monitoring

Continuously measure and analyze your power system to ensure efficient, reliable, and safe operation.

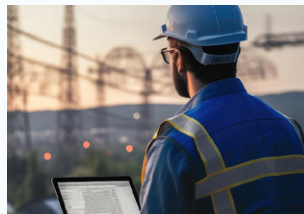

Integrated Houses

Solutions to ensure the reliability, safety, and efficiency of your complex operation.

Engineering & Integrated Services

Tailored automation solutions to get you from inception to implementation.

Field & Support Services

Field assistance when you need it to keep your system operational.

Training Services

Training for a variety of levels and topics for all QEI hardware and software.

Efficient Infrastructures Powered by QEI Automation

Modernizing your system can be complicated, QEI makes it easy with our tailored hardware and software solutions and full-service approach.

QEI offers comprehensive automation solutions through hardware, software and service offerings enabling utility, transportation and industrial customers to modernize current infrastructures allowing for real-time decisions, efficiencies and enhanced productivity. Let QEI modernize your infrastructure with flexible and scalable solutions to help you:

- Improve reliability
- Enhance efficiency
- Strengthen performance
- Increase resilience

Upgrading Your Infrastructure is Easy with QEI

INTEGRATED SOLUTIONS

We work with your existing infrastructure, and we create a tailored solution based on your needs, not our inventory.

END-TO-END PARTNERSHIP

Our extensive experience and dedicated staff allow us to work with you throughout your project lifecycle.

IMPACT YOUR BOTTOM LINE

As a partner, we view ourselves as stewards of your budget by modernizing and futureproofing your current system.

SOLUTIONS

- Operation Center
- Substation Automation
- Distribution Automation
- Integrated Control Houses

PRODUCTS

- SCADA Software
- ADMS
- Automated Products
- Engineered Assemblies

INDUSTRIES

- Gas Utilities
- Electric Utilities
- Rail Transportation
- Water & Wastewater
- Renewable Energy
